Standards

Standards are published documents that establish specifications and procedures designed to ensure the reliability of the methods, and/or services people use every day.

**Why do we need Standards?**

- Standards form the fundamental building blocks for product development by establishing consistent protocols that can be universally understood and adopted.
- Standards helps fuel compatibility and interoperability.
- Standards simplifies product development.
- Standards speeds time-to-market.
- Standards make it easier to understand and compare competing products.

**Standard Development Process**
